Quicklock Fit Out

QUICKLOCK PARTITIONS
Speed of manufacture and installation means you're up and running in your new or re-furnished office quicker than ever before

The Quicklock Modular Solution

Quicklock is an award winning innovative solution. The new revolutionary locking wall system was patented in 2006. This West Australian based company was established in 2004 and is constantly busy with the development and expansion of their product range. The quicklock solution allows clean, no mess installation with panels up to 3.5m high. It shortens office disruption time by 75% compared to conventional installations and makes re-configuration of the office layout a breeze as it is reusable. The panels are insulated using R3.5 insulation.

How does the Quicklock modular solution work

Quicklock panels are custom made to ceiling height. A top capping is screwed into the T bar of the suspended ceiling where the office wall is required, a floor track sits on top of the carpeted or tiled floor without doing any damage to the floor cover, the required panel is lifted into the top capping and by adjusting the bolts on the bottom of the panel to the required height the panels could be slid in position. The Quicklock panels clip together with the unique quicklock patented solution. The Quicklock Modular solution consists of solid panels, half and full height glass panels and modular door systems. The solid, glass panels and door system can be changed to any configuration as your business needs change.

Endless design options including:

- White boards and pin boards.
- A choice of laminates (stone, granite, wood and company colors).
- Upholstered panels (for improved sound insulation).

Solid Panels

QUICKLOCK PARTITIONS
Give you the convenience of a one-stop shop for your total office requirements

Description and specifications

Quicklock Solid panels are manufactured from 6mm MDF board. Panels are 70mm thick and have R3.5 insulation, segregated for power and data connections. Custom made height between 2100mm and 3600mm. Standard widths are 1200mm, 900mm, 600mm, 300mm and 150mm. Solid quicklock panels could be laminated and use as white boards, have a granite,stone or wood finish for reception and boardrooms. Solid panels can be upholstered to be used as pin boards or enhance the existing sound proofing. Laminated panels have an aluminum frame and are installed with aluminum top track and skirting.

What our clients are saying about us...

*I took points off for over delivery in workmanship and friendly staff!
You know the type of qualities we're not used to receiving these days.*

Bruce Filing KEA Media Group

Very happy with the work will recommend Quicklock to all my friends.

Joe Greenfeild Evergreen Marketing

*Extremely impressed with speed of delivery. Your staff are great,
very accommodating and a credit to the company.*

David Payne Book Builders

It not only has commercial value in office fit outs but would seem applicable in a range of public buildings. It is my view that such a system could lead to savings both initially and in terms of subsequent refits, both financial and environmental life cycle terms.

Luke Simpkins MP

It was great to be able to visit your office and see how Quicklock Partitions work – you have built a solid business on very good product. Luke and I were both very impressed with what you are doing.

Steven Ciobo Shadow Minister for Small Business Independent Contractors, Tourism & Art

The team were awesome! Very professional and prompt. Will definitely recommend Quicklock to others.

Caitlin Limpitlan KHC
